

INTERMEDIATE FIBER BULK CONTAINER

Description **The IFBC is an ecological alternative to the classic plastic IBC for long haul shipping. Completely safe handling is guaranteed by a pallet or lifting belt. The pallet (which can be used both with a forklift truck and a pallet truck) is solidly integrated with the body of the drum and does not require subsequent strapping operations.**

Advantages	Lightness, resistance, low cost, and customisation Possibility of filling the internal vacuum bag directly, in order to avoid contamination Possibility of emptying the contents by means of a valve on the body of the drum or through an internal bag with a-closable collector Optimisation of transport costs on containers: the specially designed dimensions of the IFBC allow the shipment of 24 drums on 20-foot containers, for a maximum of 24 tons of weight.
Products	Solid powders, grains, flakes, food Pastes and semi-liquid products
Components	Body made of 225 gr/m ² kraftliner paper Non-toxic vegetable glue Bottom and lid made of MDF or paper Closing ring with sealable galvanized steel lever
Sizes	From 330 to 530 litres
Accessories	Inner bag made of antistatic PE with possible mouth or discharge valve Wooden pallet integrated and integral with the body Incorporated CE certified lifting belt External four-colour graphics on the entire surface stamping

Illustrative table of nominal capacities (Other capacities on request)

Internal height in mm	Internal nominal diameter in mm	
		750
770		340 litres
830		365 litres
880		390 litres
920		400 litres
940		415 litres
1200		530 litres
